plants TO THE RESCUE

PLANTS HAVE THE POWER to elevate our mental health and boost our spirits. Using data collected from Charlie Hall and Melinda Knuth at Texas A&M University and published in the *Journal of Environmental Horticulture*, PsychologyToday.com summarized the findings from the study and shared some of the biggest benefits of plants. Here are seven ways plants can enhance your mood and lift your spirits.

1 REDUCE STRESS

According to the researchers, time spent in natural settings can help:

- Speed up **mental fatigue recovery**
- Slow down **heart rate and anxiety**
- Reduce **blood pressure**.

2 INCREASE MEMORY RETENTION

Researchers discovered that when subjects walked through green spaces — such as an arboretum — compared to high-traffic urban areas, they were able to **focus better and concentrate** on tests of their working memory.

ELEVATED INTELLECT

Architecture that incorporates the geometry of natural elements enhances quality of life and can produce a healing effect.

3

4 DECREASE SYMPTOMS OF DEPRESSION

After subjects took a walk in a natural environment compared to a walk in an urban environment, researchers discovered:

- An increase in subjects' **moods**
- Fewer incidents of **depressive symptoms**
- Increased **memory span**
- Decreased symptoms of **anxiety**

4

5

5 LESSEN SYMPTOMS OF DEMENTIA

Researchers found dementia patients' **cognitive abilities improved** and incidents of aggressive behavior decreased when they became involved in gardening activities.

6 GREATER QUALITY OF LIFE

Psychological well-being improved amongst those who interacted with nature, and subjects reported greater feelings of:

- Positivity
- Hopefulness
- Comfort
- Relaxation
- Overall happiness and satisfaction of life

7

7 BOOST CREATIVITY

Researchers reported subjects who took nature walks or visited parks experienced **boosts of creativity, mood and a sense of vitality**.

6
