DRIVER

Overview and Quick-Start Guide for Owners and Operators

What Is the BloomNet Driver App – and How It Helps Your Shop

The BloomNet Driver App empowers retail florists to simplify deliveries and reduce customer service issues with real-time tracking and photo proof - helping you spend more time fulfilling orders, not fixing them.

- **Photo Proof of Delivery:** Drivers can quickly capture and upload photos at drop-off, reducing delivery disputes and building customer confidence.
- **Real-Time Tracking:** Automatic status updates like “Out for Delivery” and “Delivered” keep florists and customers informed, cutting down on cancellations and “Where is my order?” calls.
- **Hands-Free Order Updates:** No manual entry needed - driver activity in the app updates Bloomlink status instantly.
- **Save Time on the Phones:** Fewer service calls means more time for what matters most: designing and delivering beautiful arrangements.
- **Fully Integrated:** Works seamlessly with all BloomNet orders.

Quick Setup and Account Creation Guide

Step 1: Create an Account | Link to BloomLink

- 1 > Go to <https://www.bloomlink.net>
- 2 > Log in to your BloomLink Account
- 3 > Click on “Utilities” in the top navigation bar
- 4 > In the left sidebar, expand the “Forms” section
- 5 > Click “BloomNet - Driver Registration Form” (see right)
- 6 > A new window will open where you will be prompted to re-enter your BloomLink Credentials and the registration will be displayed.
- 7 > Complete this Registration Form and check email for a “Welcome to BloomNet Driver” message.
